EXHIBITIONS

# down TO THE BONE

6,000 - 8,000 SQ FT

Get ready to come face to teeth (and feather!) with some of the most iconic species of all time. Prepare to meet some fascinating, newly discovered killers. Discover a dinosaur's hard knock life through the injuries and diseases that left their mark.

Featuring an impressive array of Mesozoic Era skeletons from the tiny Psittacosaurus to the immense Omeisaurus, *Dinosaurs Unearthed: Down to the Bone* also showcases, in animatronic form, the newly discovered tyrannosaur "Pinocchio rex", the fearsome feathered Dakotaraptor, and "Hell Boy" – Regaliceratops.

Whether your guests are dwarfed by the roaring T. rex or get down on their knees to come eye-to-eye with the dome-headed Stegoceras skeleton, this exhibition will intrigue and delight.

All our world-class exhibitions can be custom tailored to your audience and space requirements. We collaborate with you from our initial conversations to the pre-production site visit and right through the exhibition strike. We offer comprehensive exhibition support that includes a complete kit of materials for marketing and media relations, as well as education guides to assist in program development.

#### Exhibition Package Includes:

- 8 life-sized animatronic dinosaurs
- Up to 14 life sized skeletons including one real fossil skeleton
- Up to 30 fossils including up to 7 real fossils
